INDOOR AIR QUALITY

Your air handler & duct system is dark, damp, and cool. It is the perfect environment for odor and airborne illness causing micro-organisms to thrive. Our Products & Services prevent this growth from ever affecting your Indoor Air Quality.

Standard System Sanitizing **\$99**

Premium System Sanitizing **\$179**

Trane Dual Bulb UV Light System with 3 Year Bulb Life Installed **\$899**

9" Duct Pure Installed (up to 2000 sq/ft Whole House Air Purification System) Includes 2x Pure Air GT50 Small Room Plug-In Air Purifiers Installed **\$1499**

14" Duct Pure Installed (greater than 2000 sq/ft Whole House Air Purification System) Includes 2X Pure Air GT50 Small Room Plug-In Air Purifiers Installed **\$1799**

Note: We can also order cases (12) custom size pleated air filters to fit your grills and equipment correctly.

WIFI THERMOSTAT

Note: WiFi Thermostats require a common wire to operate correctly. Ask your tech to check your existing wiring to ensure proper function of the thermostat.

A great way to monitor and control your system from anywhere in the world, from any smart device. Honeywell WiFi Thermostats with FREE Monitoring can easily connect to your existing WIFI service and give you the power to drive savings and comfort.

\$399 Focus Pro 6000 (4.3" Medium Screen with WIFI)

\$599 Vision Pro 8000 (7" Large Touchscreen with WIFI)

MAINTENANCE AGREEMENTS

If you are a current maintenance agreement holder, we thank you for your patronage and for placing your trust in our company. We highly recommend having your system(s) cleaned and maintained on a regular basis. All equipment manufacturer's will void your warranty if you do not maintain your system on a regular basis. Our rule of thumb regarding maintenance is as follows: Year round residents should have their system serviced every six months; seasonal residents, at least once a year.

Annual Maintenance Agreement with Service Benefits **\$109**

Semi Annual Maintenance Agreement with Service Benefits **\$179**

CONDENSATE DRAIN

The most common service issue is clogged drain lines. All PVC condensate drain lines will build algae and clog over time. When your drain clogs condensation backs up into a float control switch SHUTTING DOWN your air conditioning system to prevent any water damage. To help breakup clogs, we commonly use shop vacs, nitrogen pressure, and drain cleaners. Using the following routine, does not ensure your drain line will not clog between inspections and sometimes just days after maintenance is performed (This is NOT a covered service by our maintenance inspection warranty). For these occasions, we are offering a clean out drain kit making cleaning out your drain system easier, better, and more reliable.

Note: Our technicians can show you how to clear out your own drain system and reset the float control. This can save you \$\$\$ in service fees and air conditioning downtime. ONE service call and these products can pay for themselves!

SURGE PROTECTION

We live in the lightning capital of the Country. The electrical damage due to power surges is a big problem in SWFL. Most, if not all, systems today are controlled by vulnerable computer software and hardware. To protect these vital components of your system from catastrophic failure, we offer many types of Electrical Surge Protection.

Air Handler 240 Volt Surge Arrestor Installed **\$159**

Condenser 240 Volt Surge Arrestor Installed **\$159**

Air Handler & Condenser Surge Arrestor Installed **\$295**

COMP. START ACCESSORY

Most compressors will require this component at some point in its life. When a compressor first starts, it is under the most pressure and strain during that time. This accessory can be added to your compressor's run capacitor to increase starting torque by 500%, use less electricity, and run better for extended compressor life.
